

NCCS CELEBRATES 20 YEARS OF EXCELLENCE

NCCS - A Quick Glance

NCCS, the National College of Computer Studies, was established in 1999 (B.S. 2056) as an IT education center by a group of individuals enthusiastic about promoting IT education among the technology lovers of Nepal. Located in Kantipath, the college offered various services to learners, including computer software and hardware training, software application development, and more. Over time, it gained a high reputation as an institution for IT education and simultaneously became a successful software development group, striving for excellence.

To adopt global higher education practices, the directors of NCCS took a step forward and introduced the Bachelor's in Information Management (BIM) program under the affiliation of Tribhuvan University in 2002 (B.S. 2059). In the subsequent years, NCCS undertook pioneering initiatives in higher education by introducing additional undergraduate courses such as Bachelor's in Hotel Management (BHM), Bachelor of Science in Computer Science & Information Technology (BSc. CSIT), Bachelor of Computer Application (BCA), and Bachelor of Business Management (BBM). Another significant addition was the successful introduction of Plus 2 program in the management stream that has been running since 2004 (B.S. 2061).

Under the chairmanship of the late Mr. Pranchanda Raj Anil, NCCS took another step forward and ventured into the field of school education in 2013 (B.S. 2070). They established the National Creative Co-educational School (NCCS) in Chandol, offering grades 1-12. The school has been running successfully for ten years and offers Plus 2 programs in the management and science streams. The most recent addition to the NCCS catalog was the NCCS Pre-School, established in 2021 (B.S. 2078).

Message from the Chairman:

"Education is the key to unlocking the world, a passport to freedom." – Oprah Winfrey

It is with pride that I introduce you to the world of NCCS, an institution that started humbly as an IT training center and grew to become one of the nation's most reputable educational institutions. From pre-school to bachelor's level, all under the umbrella of NCCS, we strive for excellence.

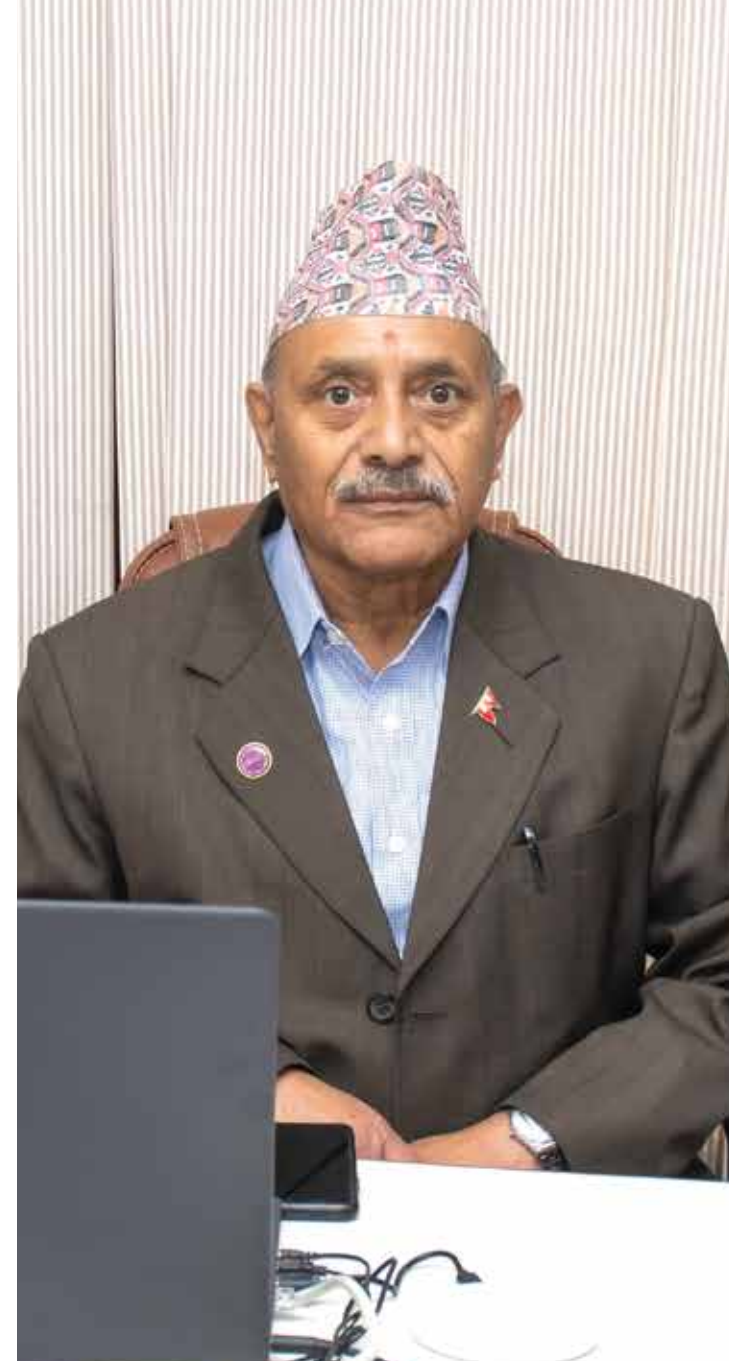

NCCS is a community of learners where excellence is a shared pursuit. Whether it's at the pre-school, secondary school, or undergraduate level, NCCS has always made its best efforts to help children blossom into well-balanced individuals—healthy in mind and spirit—and eventually create successful futures as valued citizens.

With its emphasis on academic discipline, holistic education, and adoption of global higher education practices, NCCS has gradually become a leading institution and strengthened its position in the educational landscape of Nepal.

As you peruse this prospectus, you will discover the transformative educational experiences your child can receive, starting from their early childhood days until their bachelor's level. Through engaging and meaningful learning experiences at NCCS, your child will develop essential skills, habits, and character attributes.

I take this opportunity to congratulate the directors, staff, and students. The team's every effort in making learning meaningful is highly appreciated. May you all continue to reach greater and insurmountable heights of excellence.

Binod Raj Pandey
Chairman

Message from the Principal

A proper education has the power to transform individuals personally, professionally, and socially. It ignites joy, curiosity, and a strong desire to solve problems, help others, and pursue leadership roles that positively impact the community. Education serves as the social institution through which knowledge, facts, job skills, and values are imparted to its members. One of the most crucial roles of education is to improve personal lives and contribute to the smooth functioning of society.

At National Creative Co-educational School (NCCS), our mission is to instill a literate society with purpose, a progressive society with ideas, and a conscious society working towards establishing a better and brighter future for all. Since its establishment in 2070 B.S. (2013) in the Chandol premises, NCCS has been committed to providing excellent learning opportunities. Over the past 10 years, we have made significant strides towards achieving our goals. Our school offers classes from 1 to 12, and our plus 2 level is affiliated with the Higher Secondary board, offering streams in both Management and Science. With the recent addition of the Pre-school level, NCCS has transformed into a comprehensive educational institution that caters to the educational needs of children from their early childhood learning stages.

In today's world, children face numerous temptations and challenges that they may not have the necessary life experience to navigate. However, at NCCS, we firmly believe in fostering a positive outlook and cultivating a transformative attitude in our students. Our capable and experienced faculty members dedicate their time, resources, and energy to mold and nurture our students in various aspects, encompassing culture, physical well-being, social skills, and psychological development.

As the saying goes, "Upon the education of the people of this country, the fate of this country depends." We wholeheartedly embrace this sentiment and aim to develop our students into self-sustained, independent, capable, and morally upright citizens of our country. We take great pride and joy in serving our country by shaping noble and worthy citizens who will contribute to the progress of our motherland.

We look forward to providing your child with an exceptional educational experience!

Warm regards,

Shanker Raj Joshi
Principal

Introduction

National Creative Co-educational School (NCCS) is a renowned educational institution in Kathmandu that has been in service for 10 years under the flagship of the National College of Computer Studies (NCCS) group. It is highly regarded by society as one of the leading and well-equipped schools in the area. Here are the key characteristics of NCCS:

Quality Education: NCCS focuses on providing excellent academic education to its students. The school ensures that students acquire a strong foundation of knowledge and skills across various disciplines.

Experienced and Dedicated Faculty: The institution employs experienced and dedicated teachers who are passionate about teaching and committed to the success of their students. These teachers inspire and motivate students, creating a positive and engaging learning environment.

Student-Centered Approach: NCCS ensures a student-centered approach to education. The institution recognizes the unique strengths, needs, and learning styles of individual students and provides personalized support to help them reach their full potential.

Well-rounded Education: Apart from academic excellence, NCCS emphasizes the importance of holistic development. The school offers a wide range of extracurricular activities, including sports, arts, music, dance, and various co-curricular activities, fostering physical, social, emotional, and creative development in students.

Supportive Learning Environment: NCCS strives to create a safe, inclusive, and supportive learning environment. Students are encouraged to express their ideas and opinions, promoting positive relationships, collaboration, and teamwork among students, teachers, and staff.

Modern Infrastructure and Resources: The school provides modern facilities, resources, and technology to support effective teaching and learning. This includes well-equipped smart classrooms, a library, a science lab, a computer lab, and access to up-to-date educational resources and technology tools. The school also has sports facilities for games like basketball, badminton, table tennis, snooker, and football.

Focus on Character Development: NCCS places emphasis on character development alongside academic achievement. The school aims to instill positive character traits such as integrity, empathy, resilience, and leadership, and focuses on imparting values, ethical behavior, and a sense of social responsibility in students.

Parental and Community Involvement: The school recognizes the importance of strong partnerships with parents and the community. The school actively involves parents in the educational process, seeks their input, and maintains open lines of communication.

Continuous Improvement: NCCS is committed to continuous improvement. The school stays updated with current educational research and best practices. It regularly assesses its programs, curriculum, and teaching methods to ensure they remain effective and relevant.

With its focus on holistic development and student success, NCCS is recognized as a School of Excellence.

Curriculum

At National Creative Co-educational School (NCCS), the curriculum is designed with the belief that education forms the foundation for individuals to excel in various spheres of life. The primary objective of the curriculum is to equip students with the necessary abilities, attitudes, habits, appreciations, and knowledge required to navigate the complexities of the world.

The school follows the curriculum established by the Nepal Government as its foundation. This ensures that students receive a comprehensive education that meets the national standards and requirements. Additionally, NCCS incorporates elements that preserve the cultural heritage of Nepal, recognizing the importance of cultural diversity and promoting cultural understanding and appreciation.

A key aspect of the curriculum at NCCS is the emphasis on education methodologies that foster harmony among diverse cultural and linguistic groups. This approach recognizes the multicultural nature of society and seeks to create an inclusive learning environment where students from different backgrounds can learn and grow together.

By blending the government curriculum with cultural preservation and a focus on harmony, NCCS aims to provide a well-rounded education that prepares students for the challenges and opportunities they will encounter in their future endeavors.

Family of the School

NCCS recognizes the importance of fostering harmony and cooperation among the diverse groups within its school family, including teachers, students, parents, and guardians from various nationalities, cultures, religions, and linguistic backgrounds.

To promote good relationships and enhance the education system, NCCS conducts periodic meetings and consultation programs with all the stakeholders at various levels. The school administration takes into account the feedback and recommendations shared during these consultations and works towards incorporating them into the education system. NCCS ensures that the education system reflects the needs, aspirations, and cultural sensitivities of its diverse stakeholders, ultimately creating a more inclusive and harmonious learning environment.

LEARN FROM THE BEST

Physical Facilities

NCCS is situated in a peaceful location in Chandol, KMC, ward no. 4. The school has its own newly built building with ample space for students to move around and play. It is equipped with essential facilities such as a computer lab, science lab, first-aid facility, and cafeteria. The school premises prioritize good ventilation, sanitation, and transportation services for students.

Faculty Members & Staff

NCCS boasts a team of faculty members and staff who play a crucial role in the education and overall development of the students. The faculty members are well-educated, trained, and experienced in their respective fields. They possess the necessary qualifications and expertise to deliver quality education to the students. They understand the importance of creating a positive learning environment and are dedicated to their profession.

In addition to the faculty members, the administrative staff at NCCS is cooperative and informative. They assist students, parents, and guardians with any queries or concerns they may have regarding school operations, admissions, or other administrative matters.

School's Special Policy

NCCS has implemented a special policy to ensure that students' bags are not overloaded and to promote a healthier and happier learning environment. Here are some key points of the school's special policy:

- **Separate Set of Books:** Students are provided with a separate set of books in their respective classrooms, reducing the need to carry heavy bags filled with textbooks from home. This helps to alleviate the physical burden on students and allows them to focus on other learning materials during school hours.
- **Lighter Bags:** By carrying only assignment copies and essential materials, students experience lighter bag weights, which can positively impact their physical well-being and overall comfort.
- **Homework Completion at School:** The school provides dedicated homework periods for students to finish their assignments during school hours. This allows students to manage their workload effectively and ensures that they have more leisure time at home for other activities and personal development. For senior students this might not be always possible as number of subjects increase as they reach higher classes
- **Special Classes and Support:** For students who require additional help in specific subjects, the school offers special classes to provide dedicated assistance. This ensures that students receive personalized attention and support to improve their understanding and performance in challenging subjects.

By implementing this policy, NCCS aims to create a beneficial learning environment where students can focus on their studies, reduce unnecessary physical stress, and maintain a healthy work-life balance. The school's commitment to providing support and resources for academic success demonstrates its dedication to the well-being and academic progress of its students.

Student Assessment

NCCS has implemented a continuous monitoring system to assess and track the performance of students. The school maintains separate folders to record the assignments, projects, and other academic work of each student. These tasks are regularly assigned and completed by students as part of their learning process. The school conducts unit tests and quarterly examinations to evaluate the students' understanding and knowledge in different subjects. The performance of students is evaluated based on their scores and grades in assignments, projects, unit tests, and quarterly examinations. This evaluation helps identify their strengths and areas for improvement.

The school holds periodic consultations with parents or guardians to discuss the performance of their child. These consultations serve as an opportunity to share feedback, address concerns, and provide guidance for further improvement. The progress reports are sent to parents or guardians, who are required to review and provide their signature, along with any comments or suggestions.

Student Portal

NCCS has deployed a student portal to enhance communication and facilitate the exchange of information among students, teachers, and parents. This student portal is a software application designed and operated by the NCCS Software division. Here are the key features and benefits of the student portal:

- **Parent Access:** Parents have the ability to log in to the portal and access important notices, information, and updates related to their child. They can also provide various information about their child and check their child's assignments.
- **Teacher Assignment Feeding:** Teachers can use the portal to input and share home assignments with their students. This allows for easy distribution of assignments and helps students stay organized and informed about their academic tasks.
- **Student Access:** Students have their own login credentials to access the portal. They can view their assignments, check for important notices from the school, and stay updated on various school-related information.
- **Password Protection:** The student portal ensures privacy and security by requiring login credentials and password protection. This helps to safeguard sensitive information and maintain confidentiality.

The student portal streamlines the flow of information and promotes efficient collaboration among all stakeholders involved in a student's education.

**STARTED WITH SCHOOL FOR
GRADES 1-10 , TODAY NCCS
STAND TALL WITH THREE WINGS**

- **PRE-SCHOOL**
- **BASIC LEVEL (GRADES 1-8)**
- **SECONDARY LEVEL (9-12)**

NCCS Pre-School

A Pre-School, also known as a pre-primary school, is an educational establishment or learning space that offers early childhood education to children before they begin compulsory education at primary school. During the first 3 to 5 years, children are capable of absorbing a significant amount of information, as their brains experience rapid growth. It is during these years that children need to learn and develop self-help skills, social and communication skills, questioning skills, and creative abilities. Therefore, providing children with an environment that supports their holistic development is essential.

The "Pre-school" wing is the latest addition to NCCS, located within its school premises, starting from the academic session 2078. Currently, we have 31 enthusiastic little children who love coming to school every day, excited and eager to learn and enjoy their entire day.

At Pre-School, we offer a curriculum that combines both play-based and academic activities for our learners. Play-based activities help transform children into curious and enthusiastic learners who find joy in learning in their own unique ways. Simultaneously, academic activities lay the foundation of discipline and encourage children to focus on academics as they progress to the primary level. Our programs also include teaching children about our seasonal festivals, culture, and community traditions. Additionally, we conduct dance and music classes to foster confidence, artistic and creative skills, and language development.

Our teachers are trained in early childhood education and understand that all children go through the same stages of development, albeit at different rates. In addition to planning classroom activities based on a comprehensive curriculum, our teachers establish rapport with children and families, creating an age-appropriate physical environment.

We invite parents and pre-scholars to visit the school and experience the safe and supportive atmosphere firsthand, as well as meet our committed, happy, and effective teaching staff.

Eligibility Criteria for Admission Pre-School

The eligibility criteria for the admission to Pre-school are:

- Age group – around 3 yrs at the time of admission
- Simple interview with the Parents
- Birth registration certificate

Basic School Education

NCCS offers education across three levels: Basic level Junior (grades 1-4), Basic level Senior (grades 5-8), and Secondary level (grades 9-10). In the Basic level Junior, the class teachers take responsibility for the students and focus on providing a strong foundation in education. As students progress to higher grades, subject teachers who specialize in their respective fields deliver education based on a well-prepared educational plan.

NCCS prioritizes practical education and ensures that students have access to necessary teaching materials and equipment. The school is equipped with modern amenities and provides a progressive learning environment for students. The emphasis on excellence and continuous improvement reflects NCCS's commitment to providing a nurturing and conducive atmosphere for academic and personal growth.

By offering a comprehensive education across different grade levels, NCCS aims to prepare students for future challenges and equip them with the skills and knowledge necessary for success.

Eligibility Criteria For Admission

Basic Level (Grade 1)

The eligibility criteria for the admission to Grade 1 are:

- Age group – around 5+ yrs at the time of admission
- Selection interview
- Result of UKG from previous school and supportive documents
- Birth registration certificate
- Simple interview with the Parents

Other Grades (2-9)

The eligibility criteria for the admission to other grades are:

- Selection test
- Selection interview
- Result of last grade from previous school and transfer certificate
- Birth registration certificate
- Simple interview with the Parents

Secondary Studies (Plus 2)

NCCS is a forward-thinking institution that emphasizes excellence in education, personal development, and preparedness for scientific advancements. By providing a nurturing and challenging learning environment, NCCS aims to prepare students to become competent, compassionate, and successful individuals.

Plus 2 at Paknajol

Other Facilities & Amenities

Classrooms and other activities

NCCS believes in providing a modern and interactive learning environment for its students. Here are some features and activities related to classrooms and other educational programs at the school:

- **Smart Boards/Projectors:** The classrooms are equipped with Smart boards or projectors, enabling teachers to incorporate technology and multimedia resources into their teaching methods. This interactive approach enhances student engagement and promotes active learning.
- **Educational Movies:** The school organizes regular screenings of short educational movies providing students with an alternative and visual learning experience. These movies help to reinforce concepts taught in the classroom and provide additional knowledge on various subjects.
- **In-house Competitions:** NCCS encourages students to participate in various in-house competitions. These competitions can include debates, elocutions, quizzes, science fair, art exhibitions, and more. They provide students with opportunities to showcase their skills, knowledge, and talents in a competitive and supportive environment.
- **Inter-School Programs:** Students also have the opportunity to participate in inter-school programs organized by various schools. These programs can include sports competitions, cultural events, academic quizzes, and other collaborative activities. Such events foster healthy competition, teamwork, and social interaction among students from different schools.

By integrating technology, organizing competitions, and participating in inter-school programs, NCCS aims to provide a well-rounded educational experience for its students. These initiatives promote creativity, critical thinking, collaboration, and overall personality development among the students.

Conference Hall

NCCS takes pride in having a well-equipped multipurpose conference hall that serves as a venue for various events and gatherings. The conference hall is designed to provide a comfortable and conducive environment for meetings, performances, presentations, seminars, and other special occasions.

Canteen

NCCS takes pride in offering a spacious modern canteen facility within the school premises. The canteen serves a variety of healthy and nutritious food items to cater to the dietary needs of students, faculty members, and staff. The menu includes a balanced selection of meals, snacks, beverages, and other foodstuffs. The canteen operates on a regular basis, providing meals and snacks at scheduled times during the school day. The canteen is designed to accommodate a significant number of students, faculty members, and staff comfortably providing a pleasant environment for individuals to enjoy their meals.

Transportation

NCCS understands the importance of safe and reliable transportation for students. To cater to the transportation needs of students, the school offers pickup and drop facilities through its own fleet of school buses at a minimum cost. Here are some details about the transportation services provided by NCCS:

- **Pickup and Drop:** The school buses are available for students who require transportation services. They ensure that students are picked up from designated locations and safely transported to the school premises. Similarly, after school hours, the buses drop students off at their respective locations.
- **Trained Drivers and Helpers:** The buses are driven by experienced drivers who prioritize the safety and well-being of the students. The drivers are trained to follow traffic rules and maintain a responsible driving approach. Additionally, there are helpers on the buses who assist the students and ensure their safety during the commute.
- **Security Measures:** The school takes security seriously and has implemented measures to ensure the safety of students. Only authorized persons, who possess a valid identity card issued by the school, are allowed to pick up students from the buses/ school. This helps maintain a secure environment and ensures that students are handed over to the right individuals.

By offering transportation services, NCCS seeks to provide a convenient and secure commuting option for students. It emphasizes the importance of punctuality, safety, and efficient management of transportation to ensure a smooth and hassle-free experience for students and their families.

Science Labs

NCCS is equipped with fully furnished and well-equipped science labs to provide students with a comprehensive understanding of scientific concepts and facilitate hands-on learning. The school has separate labs for Physics and Chemistry, allowing students to engage in practical experiments and demonstrations.

The science labs are designed to meet the requirements of the curriculum and provide a safe and conducive environment for students to conduct their practical experiments. Trained lab assistants and teachers are present to guide and supervise students during their lab sessions, ensuring proper utilization of lab equipment and adherence to safety protocols.

Library

NCCS takes pride in its modern library, which is well-equipped to cater to the diverse reading interests of students of all age groups. The library houses a comprehensive collection of course books, reference books, daily newspapers and other relevant materials that support the academic curriculum and promote self-study.

The library at NCCS is designed to accommodate a significant number of users at a time, ensuring a comfortable and conducive environment for reading, studying, and conducting research. Students are encouraged to make the most of the library's resources to enhance their learning experience and broaden their knowledge base.

Computer Lab

NCCS computer lab is equipped with high-speed internet and Wi-Fi connectivity and is headed by a team of well-educated computer experts who provide guidance and assistance to students in utilizing the resources effectively. The lab allows students to collaborate on projects, communicate with peers and educators, and enhance their digital literacy skills.

The lab is designed to accommodate at least 30 students at a time, providing each student with individual workstations to work on their assignments and practical tasks. This setup allows for a focused and productive learning environment, where students can apply their theoretical knowledge and gain hands-on experience in various computer applications and software and develop their technological skills.

The presence of a well-equipped computer lab at NCCS reflects the institution's commitment to keeping up with the advancements in technology and providing its students with the necessary tools and resources to thrive in the digital age

Extra-Curricular Activities

NCCS recognizes the importance of extracurricular activities in the overall development of the students and offers a wide range of options to cater to their interests and talents. The school conducts both in-house and outdoor activities to provide a well-rounded educational experience.

In-house activities include:

- **Dance and Music:** Students have the opportunity to learn and showcase their talents in various dance forms and musical instruments. Dance and music classes are conducted to develop their artistic skills and promote self-expression.
- **Art and Craft:** Students can explore their creativity through art and craft activities. They engage in drawing, painting, and other artistic projects, allowing them to develop their imagination and fine motor skills.

Outdoor activities include:

- **Sports:** NCCS encourages students to participate in various sports activities to promote physical fitness, teamwork, and sportsmanship. Games such as badminton, table tennis, basketball, and other outdoor sports are organized for students to develop their athletic abilities.
- **Playground Facilities:** Nursery and primary class students have access to a playground with swings, slides, see-saws, and other age-appropriate equipment. These activities provide a platform for students to engage in active play and develop their gross motor skills.

By offering a diverse range of extracurricular activities, NCCS aims to foster students' holistic development, enhance their talents and skills, and promote a healthy and active lifestyle.

Annual Event

NCCS organizes a special annual event that serves as a platform to showcase the talents and achievements of its students. This event is a celebration of the school's progress and provides an opportunity for parents, guardians, and guests from various social spheres of life to come together and witness the growth and development of the students.

Field Trips & Educational Visits

NCCS recognizes the value of experiential learning and believes that educational field trips and excursions play a vital role in enhancing students' knowledge and understanding of various subjects. With prior consent from parents and guardians, the school organizes such trips to provide students with practical, hands-on learning experiences beyond the confines of the classroom.

These field trips and excursions are carefully planned to align with the curriculum and educational objectives. They aim to complement and reinforce the topics being taught in class, allowing students to witness real-world applications of their learning. By stepping out of the school environment, students have the opportunity to explore different places, interact with experts in various fields, and gain a deeper understanding of the subjects they are studying.

School Timings

The regular school timings at NCCS are from 8:15 am to 4:45 pm. Till 3:00 pm regular classes are conducted where students engage in various academic activities, including practical sessions, and co-curricular activities. There is a designated lunch break provided by the school to ensure students have time to eat and recharge.

After the regular school hours, there is a snacks break for the students to have a quick refreshment. Following the snacks break, special tutorial classes are conducted until the last bell, which is around 4:45 pm. The timings are the same for all the students and staff. These tutorial classes are aimed at providing additional support to students, helping them with their homework, and focusing on their weaker subjects. The tutorial classes may vary in nature, such as special classes, club classes, or extracurricular activities (ECAs), depending on the schedule.

During the winter season, the school timings are slightly lessened. The school starts at the regular time of 8:15 am but continues until 4:15 pm, allowing for the adjustment of daylight hours.

Health Care

NCCS recognizes the importance of maintaining the health and well-being of its students. The school ensures that necessary health care facilities and services are provided to address any medical needs or emergencies that may arise during school hours.

The school has dedicated and trained health personnel available on-site to provide first aid assistance to students in case of minor injuries or illnesses. Additionally, NCCS has sick room for boys and girls, where students can rest and receive appropriate care if they are unwell.

If any health abnormalities are observed in a student, the school promptly informs the parent or guardian and provides them with necessary information and advice. This ensures that parents are aware of their child's health status and can take appropriate measures.

NCCS also organizes various health care camps within the school premises for the benefit of students. These camps may include medical check-ups, awareness programs, and health-related workshops to promote a culture of wellness and preventive care among students.

By prioritizing the health and well-being of its students, NCCS aims to create a safe and supportive environment that fosters their overall growth and development.

Complaint Procedures and Action on Same

At NCCS, the school administration values the feedback and concerns of parents, guardians, and well-wishers. The school has established a complaint procedure to address any issues or grievances raised by stakeholders.

If someone wishes to advise, suggest, or complain about any matter, they can contact and discuss their views with the respective class teachers, coordinator, or the Principal. The school encourages open communication and dialogue to understand and resolve concerns effectively.

For written complaints, the school provides a complaint form upon request. The complainant is required to fill out the form, provide necessary details, and duly sign it. The completed form should be submitted to the respective authority, such as the Principal or designated personnel responsible for handling complaints. Once a complaint is received, the school takes appropriate action to investigate and address the issue. NCCS is committed to ensuring a fair and transparent process in handling complaints and strives to resolve them in a timely manner.

Vision For Future

NCCS envisions a future where education serves as a comprehensive foundation for children, empowering them to excel in all aspects of life and become successful individuals. Recognizing that education is not solely for material gain, but a path towards enlightenment and personal growth, NCCS is committed to providing a nurturing and inspiring environment for its students. With the valuable cooperation of parents and well-wishers, NCCS aims to fulfill its mission of delivering excellence in education.

By adhering to its principles and working together with stakeholders, NCCS envisions a future where its students emerge as confident, knowledgeable, and morally upright individuals, ready to contribute positively to society and achieve personal success in their chosen paths.

WHERE THE LEARNING BEGINS

After Secondary School [+2 Level]

After completing secondary school, National College of Computer Studies (NCCS) at Paknajo provides students with a range of undergraduate courses to further their education. NCCS is affiliated with Tribhuvan University, Nepal's oldest and prestigious university. Students have the opportunity to enroll in various bachelor's degree programs at NCCS, located in Paknajo. The following undergraduate courses are offered:

Bachelor's in Information Management [BIM]

This program focuses on developing students' knowledge and skills in the field of information management, including areas such as database management, system analysis, programming, and business management.

Bachelor's in Hotel Management [BHM]

This program is designed for students interested in pursuing a career in the hospitality industry. It covers various aspects of hotel management, including hotel operations, food and beverage management, front office operations, and event management.

Bachelor of Science in Computer Science & Information Technology [BSc.CSIT]

This program provides students with a strong foundation in computer science and information technology. It covers subjects such as programming, algorithms, computer networks, database management, software engineering, and web development.

Bachelor of Business Management [BBM]

This program is designed to develop students' understanding of business principles and practices. It covers areas such as marketing, finance, human resource management, organizational behavior, and entrepreneurship.

Bachelor of Computer Application [BCA]

The BCA program focuses on equipping students with the necessary skills and knowledge in computer applications. It covers topics such as programming languages, computer networks, database management, software development, and web technologies.

By offering these undergraduate courses, NCCS aims to prepare students as competent and valuable human resources who can meet the challenges of the future and excel in all aspects of life. NCCS believes in providing quality education and nurturing students to become successful professionals in their chosen fields.
